Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3692

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Paul et al. (U.S. Patent No. 7,104,443), as applied to claim 11 above.

[Claim 12] As per col. 4, line 41 through col. 5, line 9 of Paul, a consumer may surrender a monetary value in exchange for the MBD card or an extension of credit. The MBD card can give the cardholder the benefit of a "float." As seen in col. 14, line 38 through col. 15, line 19, other fees associated with the MBD card, such as fees associated with transactions returned for non-sufficient funds, may also be charged to the cardholder. However, Paul does not explicitly disclose the step of communicating said charged fee to the consumer electronically or by printed media. Official Notice is taken that it was old and well-known in the art of financial transactions at the time of Applicant's invention to disclose all transaction-related fees to an account-holder, either electronically or on paper; such disclosure is often required by law. Therefore, the Examiner submits that it would have been obvious to one of ordinary skill in the art at the time of Applicant's invention to modify Paul to explicitly perform the step of communicating said charged fee to the consumer electronically or by printed media in order to conform to federal and local laws that require full disclosure regarding transaction-related fees associated with a financial account.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

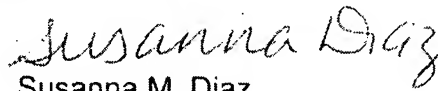

Giordano et al. (US 2006/0178986) – Discloses a system and method for processing financial transactions using multi-payment preferences.

Bozeman (U.S. Patent No. 6,754,640) – Discloses a universal positive pay match, authentication, authorization, settlement, and clearing system.
